

# Visible area and lines for setting of clips

For tensioning of vinyl fabric you have to set the cuts of clips and mandrels of 4 cm, per meter you need 7 to 8 pcs.

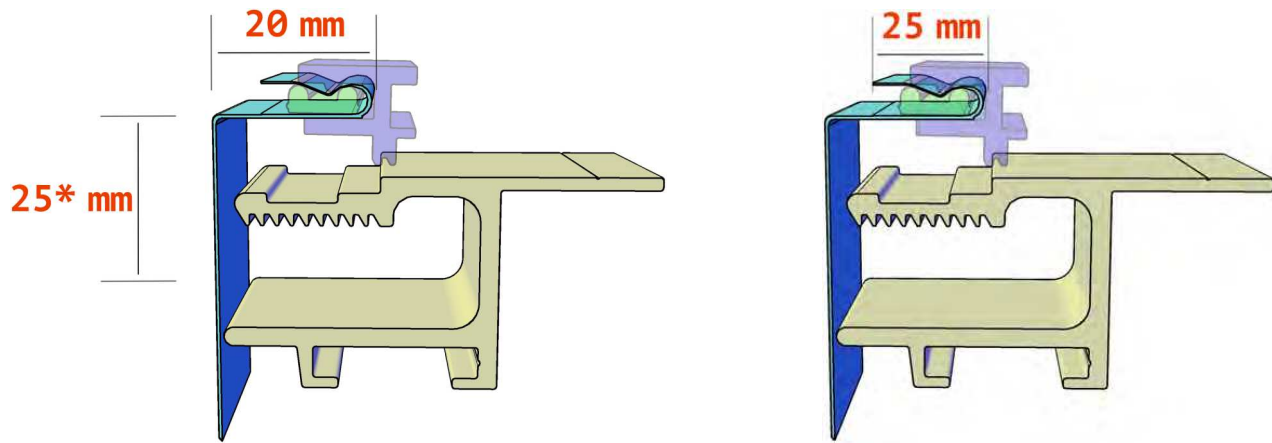

- A Visible area
- B Line for clips
- C Minimum of vinyl for tensioning (In order to be able to tighten the vinyl more easily we recommend an oversize of at least 10 cm all around. The edges can be cut off after tensioning.)
